MICHELL'S COLD STORAGE LIL. GIGANTEUM

"A MONEY MAKER"

COLD STORAGE LILIUM GIGANTEUM

EVERY Florist who has a trade for Lilies at Holiday time will do well to force a quantity of these; it means a sure crop; no disappointment. *Plant Now* for Christmas and New Year's blooming; brought into flower without too much forcing, the results are usually very fine. We have an exceptional fine lot of Bulbs of our own importation, packed as follows:

	Bulbs per case	Price per case	Price per 1000
6 to 8 in. bulbs, . .	350	\$21.00	\$60.00
7 to 9 in. bulbs, . .	250	20.00	80.00
8 to 10 in. bulbs, . .	200	21.00	105.00

The above are sold in original cases only and should be unpacked and potted on receipt. If properly handled Lil. Giganteum from cold storage can be brought into flower in 10 to 12 weeks.

We do not recommend forcing cold storage Lilies during the exceedingly hot summer months.

Note.—Unless otherwise instructed all cold storage lilies are shipped by express. Freight shipments travel at purchaser's risk.

A NOVELTY FOR 1913

"NEW GERANIUM" HELEN MICHELL

We have secured the introduction and sole output for this coming year of a new scarlet Geranium. This is a great improvement over all and any of the existing varieties, even including the standard Alphonse Ricard. It is a geranium which in a 4-inch pot plant produces from four to six enormous bright scarlet flower trusses, which are of a more brilliant shade than that of Alphonse Ricard. The latter is the first of the scarlet and our new variety differs from it inasmuch as the flowers have no pinkish cast and are of a clear vermilion. The trusses are enormous in size and will not burn in the brightest sun. It is without doubt the showiest of all geraniums, and must in the near future be the leading Scarlet Geranium.

We are booking orders now for delivery from 2¼-inch pots, January, 1913, onward, at the following prices, all orders being filled in strict rotation:

2¼-inch pots, 25c. each; per dozen \$2.50; \$15.00 per 100; per 1000 \$125.00.

A LINE FROM A GERANIUM EXPERT.

White Marsh, Md.

I consider the Helen Michell an exceedingly fine variety and predict for it a great demand.

R. VINCENT, JR. & SON.

Messrs. Vincent have already booked their requirements for a large quantity of this grand novelty.

22 YEARS OF SUCCESS IN BULB SELLING**EASTER IN 1913
COMES MARCH 23***Lil. Harrisii (Michell's Special Brand)**Lil. Formosum*

MICHELL'S SUPERB EASTER LILY BULBS

LILIUM HARRISII (Michell's Special Brand)

By special brand we mean Lilies that have been grown, harvested and packed especially for us. They are the cream of the Bermuda Lily Crop, being a selection of the most uniform bulbs gathered in districts where the smallest amount (if any) disease exists. Every year the florists are making greater demands for this particular strain and we advise ordering early.

LILIUM FORMOSUM (Regular Strain)

There is not another lily quite as well adapted for the grower as the Lilium Formosum. This statement especially holds good with the man who has trouble in maintaining a temperature of 60 degrees and over. Formosums have been known to do well in a carnation house. So long as the bulbs are started early and you have a pot full of roots and a good growth by February the rest is usually easy.

MICHELL'S SPECIAL QUALITY

These are an extra selection from the finest bulbs in Japan. The stock has been very carefully rogued and all weaklings and otherwise undesirable looking bulbs have been discarded. **These should suit the Critical Florist.**

TESTIMONIAL

The 6,000 Michell's Special Quality Multiflorum bought last season proved remarkably vigorous. Of course we gave them proper culture, also supplied them with **the right stimulants at the right time.** The flowers were of large size and of great substance, the whole crop being superior to anything we ever had in lilies for purity and general satisfaction.

CALLA ELLIOTTIANA

True Yellow Calla
(Ready in October)

This beautiful novelty should be extensively planted by all florists, who have cut flower trade, for which purpose it is admirably suited. Some of our finest decorations include this variety. The contrast of the golden yellow flowers placed among other blooms and foliage is truly remarkable, making a beautiful sight. The spotted foliage shows the flower off, when using it as a pot plant, to a great effect. In a short time this new variety will be

UNNAMED HYACINTHS (for Bedding and Forcing)

Our stock of these is unusually large and fine, we recommend them for bedding only, although many florists still use them for forcing; for the latter purpose, however, we would advise the planting of the **Second Sized Named Hyacinths** offered above, as they seldom fail to give complete satisfaction.

MICHELL'S LATE TULIPS FOR OUT DOOR PLANTING OR MODERATE FORCING

This class of tulips are, besides interesting, extremely profitable, as a cut bloom in May nothing outdoors can equal them. The stems are extremely long, making the flowers valuable for decorative work. When cut they last a long time in water. The named varieties are best. Plant a few thousand of them this season and they will repay handsomely.

PARROT OR DRAGON TULIPS

These belong to the late-flowering class, and, on account of their peculiar markings and shadings, are much in demand. They are curiously curled and crested. We offer first size bulbs only in Parrot Tulips, as second size rarely bloom the first year.

MICHELL'S DOUBLE NARCISSUS OR DAFFODILS

The Narcissus or Daffodil is becoming more popular every year. It is hardy in every way and thrives most anywhere. For naturalizing in woods and fields, nothing equals them. When once established they multiply rapidly and in a short time cover tremendous areas. Our Narcissus bulbs are all grown on contract by the most reliable producers in Europe, and customers may depend upon getting strictly first-class goods. We offer the best and largest bulbs only.

Alba Plena Odorata. A very sweet-scented pure white variety called Double Poet's Narcissus; it flowers later than many of the other daffodils, and is not desirable for forcing. It makes a handsome show bedded among perennial plants and shrubbery; height about 15 in. 15c. per doz., per 100, 75c., \$6.50 per 1000.

Incomparable Double. On account of the peculiar suffusion of the colors in the flower, this variety is also known as "Butter and Eggs." The color is yellow and orange and makes an attractive cut bloom. Its greatest value is for outdoor planting as it does not force so well. Height about 16 in. 15c. per doz., per 100, 95c. \$8.50 per 1000.

Orange Phoenix. A variety similar to the above, except for coloring, which is a light yellow, almost white, with a yellow centre. It is splendid for forcing or pot culture. It is also called "Eggs and Bacon." Height about 16 in. 18c. per doz., per 100, \$1.00, \$9.50 per 1000.

Sulphur (or Silver) Phoenix. Flowers very large, of a blush-white; the centre is exceptionally sulphur colored; excellent for forcing or outdoor planting. Height about 18 in. 25c. per doz., per 100, \$1.50, \$12.00 per 1000.

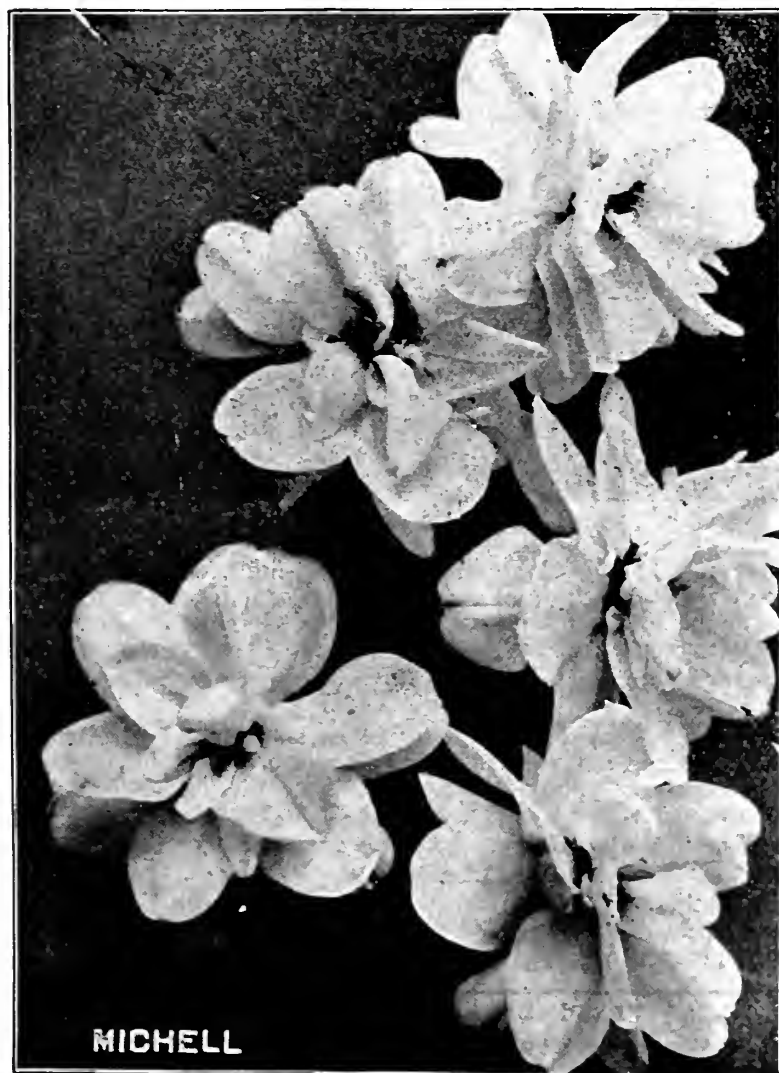

Double Narcissus. Monster Von Sion

Von Sion. (*Telamonius Plenus*.) The true double daffodil. Our stock of these comes from one of the largest daffodil producers in Holland. It should be planted extensively in woods and fields for naturalization. Height about 15 in.

Michell's Fancy Giant Cyclamen

CYCLAMEN

Of this important florist's flower we now offer two distinct strains, both unchallenged in their class as "distinctively superior."

MICHELL'S "DISTINCTIVE" GIANT

This is the English strain, grown for us exclusively by a grower of world-renown, whose sole output is handled by us, consequently our quality cannot be duplicated. Flowers are gigantic; colors clear and superb; specimen plants are a thing of beauty and always win first prize at exhibitions.

MICHELL'S GIGANTEUM CYCLAMEN (Continental Strain)

Again this is grown for us exclusively by a specialist, but on the Continent, and the distinction between the former and this strain is, that the Giganteum strain produces comparatively smaller flowers but twice and three times the number of flowers at one time, also that it flowers much earlier. German growers invariably prefer this strain, as it is the strain of the Fatherland.

MICHELL'S "DISTINCTIVE" STOCKS

For years we have made a specialty of supplying "distinctive" strains and have built up a reputation bar none. Our stocks are easily distinguished by their *superior quality, strong germination,* and a *remarkably small percentage of single flowers.*

MICHELL'S FLOWER MARKET STOCK

A branching stock of remarkable vigor of growth and size of bloom; produces its flowers evenly distributed over the stem and very early. A single plant can readily produce from 10 to 15 separate flower branches equally perfect. The type is of *Cut-and-Come-Again*, but much superior than what is usually known by that name. Our assortment of colors should satisfy the most critical grower.

MICHELL'S CELEBRATED GRASS SEED MIXTURES

SEPTEMBER AND OCTOBER ARE TWO SPLENDID MONTHS FOR SOWING GRASS SEEDS

Nowhere in Philadelphia is the amount of Grass Seed handled by us equalled. Quality has always been our precept. Our prices will be found exceedingly low. We aim to supply only pure, clean grasses, strictly free from chaff or adulterations. All grass seed before being purchased is sampled and submitted to the best experts in Europe as well as the U. S. Dept. of Agriculture for tests of purity and germination. Grass seed is one of our specialties, and on account of our enormous sales, we can offer it at attractive prices. Last year's sales were very great, and they are constantly on the increase.

SEASONABLE FARM SEEDS

Prices Subject to Market Changes

Cutting Alfalfa on the farm of R. Mason Lisle, Paoli, Pa.
Seed furnished by us.

We make a specialty of the very best obtainable in this line; cheap farm seeds are expensive at any price, besides a poor crop they mean an inferior quality. Samples are mailed, without any charge, on application.

RECLEANE^d ALFALFA

Now is the time to sow

Sow $\frac{1}{2}$ bushel per acre in May or during August and early September, or most any season when weather conditions are favorable, top dress it with manure every fall, and it will rarely winter kill. It can be cut usually three times in one season. 20c. per lb. Write for prices on larger quantities, as it changes constantly.

PURITY NOTE.—We have on file a U. S. Government report showing the Alfalfa seed sold by us to be over 99½ per cent. pure, germination test over 94 per cent. in two days.

TESTIMONIAL ON MICHELL'S ALFALFA.

The Alfalfa I bought of you was sown on Sept. 4th. By September 9th it was showing above the ground and to-day, the 24th, I have a stand three inches high. I am simply amazed at the good quality of the seed.

DR. W. R. EARECKSON.

CLOVERS, Etc.

Alsike or Swedish Clover. The hardiest clover in cultivation. Particularly valuable when sown for mixing with other hay crops. One sowing lasts many years. Sow 15 lbs. per acre alone or 8 lbs. where sown with other crops. Sow from April to June in the late summer and autumn. Height, 1 to 3 feet, according to climate and soil. Price, 25c. per lb. Price on large quantities on application.

Bokhara Clover. A tall, quick growing variety, principally used for providing food for bees. Sow early in April; 15 lbs. per acre. Height, 3 to 5 feet. Price, 30c. per lb., per 10 lbs. \$2.50.

Crimson Clover (*Delaware grown*). Far superior to imported. The latter is not well able to withstand the winter. Used principally for soiling or green manuring, is also relished by cattle when they become accustomed to it. Sow 20 lbs. per acre, any time from May until middle of October. Height about 18 inches. 15c. lb.

Red Clover (*Medium*). Principally sown for hay purposes on timothy fields early in the spring. Sow 20 lbs. per acre if alone or 15 lbs. where other grass or hay crops are standing, from March 15th to May 1st and in the late summer and autumn. Height, about 18 in. to 2 ft. Price, 25c. lb. Larger quantity price on application.

Mammoth Red Clover (*Pea Vine Clover*). Also called English Cow Grass. This sort is very similar to the above, excepting that it grows somewhat larger and remains established longer. Sow from March 15th to May 1st and in the late summer and autumn; 15 lbs. per acre if sown alone or 10 lbs. if sown with another hay or grass crop. Price, 25c. lb. Write for price on larger quantities; changes constantly.

White Dutch or Lawn Clover (*Fancy Recleaned*). For use on pasture lands it is extremely valuable. Sow 10 to 12 lbs. per acre on land seeded with grass or other grain from April 1st to September 1st. Price, 40c. per lb., 5 lbs. \$1.95, \$3.80 for 10 lbs., \$37.50 per 100 lbs.

Winter Rye. Sow 1 to 1½ bushels per acre during September, October or early November. It makes an excellent early green food in spring, and may be used for turning under or harvesting. 10c. qt., peck 40c., \$1.35 per bu.

Timothy Seed. Our stock of this is unusually large and of very good quality; for sowing among wheat as a second year hay crop or for sowing alone for a first year hay crop this is extensively used. Sow $\frac{1}{2}$ bu. per acre alone or 6 to 8 qts. with wheat. 12c. lb.

Sand or Winter Vetches (*Vicia Villosa*). Fine for forage or turning under, matures several weeks earlier than Crimson Clover. Very nutritious, growing 5 to 6 feet high in the poorest soil. Sow $\frac{1}{2}$ to 1 bu. per acre. 18c. per lb., 10 lbs. \$1.60, \$8.50 per bu. of 60 lbs., 100 lbs. \$14.00.

HEADQUARTERS FOR SEED WHEAT

Our Seed Wheat is grown principally on the farms or estates of gentleman farmers who bear in mind the most important point in wheat growing, that is, well fertilized ground. Most of the wheat offered here has been engaged by us and has a record of having yielded from 36 to 40 bushels per acre. Sow $\frac{1}{2}$ to 2 bushels per acre (60 lbs. per bu.). All the leading sorts about \$1.75 per bushel.

Hydrocyanic—Acid Gas—Cyanide Potassium—Fumigation as given to us by a practical gardener. Very Poisonous to human beings and animals. Put a tablespoonful of water in a galvanized iron pail add to this 1 oz. of Sulphuric Acid wrap an ounce of Cyanide of Potassium in paper and place it in the bucket which should be placed near the door of the greenhouse to afford quick exit; the moment the Cyanide strikes the liquid it generates a poisonous gas which must not be inhaled. The above charge is sufficient for a house 20 x 100 ft. Don't open the greenhouse for at least 12 hours. One of the ventilating sash should be arranged so it can be opened from the outside to allow the fumes to escape entirely before entering. This is claimed to be the only and best remedy to absolutely kill the white fly. It is claimed that it will not injure the most delicate plant but the user should take great care of himself. We can supply all the ingredients for making this.

THE BATE EVAPORATOR

This consists of a bottomless pan, which fits directly over your steam or hot water pipes, the latter making the bottom of the pan. It is held in place by a clamp that goes around the under side of the pipe, fastening on the projecting lugs that are on the pan; the clamp is provided with a set screw which draws the pan down firmly on the pipe, making it watertight by placing a gasket between the bottom of the pan and the surface of the pipe. Be sure and cut away the rubber on the inside so as to leave the pipe exposed in the bottom of the pan. For proper fumigation with Nicotine insecticide requires 3 pans for a house of 100 x 25 feet, or say one pan to every six or eight thousand cubic feet of air space. Made for the following sized pipe: 1 inch, 1 1/4 inch, 1 1/2 inch and 2 inch. Always state for which size it is wanted when ordering. Price, f. o. b. factory: Each 60c., per dozen \$6.60. Larger quantities at 50c. per pan.

**THE FAMOUS PRAIRIE STATE INCUBATORS**

The poultry yard will frequently be found a valuable addition to a florist's establishment. Believing this to be true we have pleasure in calling your attention to this famous make of incubator.

The Prairie State Incubators have made good since the day of their introduction which is many years ago; the improvements that have been added are the results of developments which experience has proven to be both practical and successful.

In the building, design and construction of the Prairie State Incubator, every known factor to the present time has been taken into consideration. For instance, an experimenter or manufacturer presents some new feature for which he will make strong claims, but when subjected to the test of every-day practice, the impracticability and uselessness of his device readily becomes apparent. Do not be misled by the freak incubator, "the most wonderful incubator ever invented," that somebody has made a wonderful discovery all by himself and now has the machine that will surpass the hen in every particular. Great improvements do not come that way. They are the slow growth of standard practice.

GROWN FROM A SINGLE PLANT TO BE COMPETED FOR AT THE
NATIONAL FLOWER SHOW, NEW YORK, APRIL 13, 1913

This new Geranium is introduced by us as THE BEST COMMERCIAL NOVELTY FOR 1913, and in order to popularize it the first year of its introduction, we are offering the above remarkable prize, hoping that every grower in the land will compete.

The competition is absolutely fair as no plants are disseminated until January, 1913, and no larger plants are then furnished than from 2¼-inch pots. Every one knows how to grow a Geranium, and it can be carried to the Show, avoiding express charges, delays and damages.

ORDERS ARE FILLED IN ROTATION AS BOOKED, SO ORDER NOW

THE BEST COMMERCIAL NOVELTY FOR 1913
The New Clear Scarlet Bedding Geranium
"HELEN MICHELL"

(Name registered with S. A. F. & O. H.)
(Cross-Seedling Jean Viaud X Alphonse Ricard)

Introduced by HENRY F. MICHELL CO.

Seed, Bulb and Plant-growers.

518 Market Street, Philadelphia.

OUR CLAIM

for this novelty is, that it surpasses all other Scarlet Geraniums.

- (1). In brilliancy of color.
- (2). In size of bloom.
- (3). In number of clusters to the individual plant.
- (4). In vigor and strength.
- (5). In earliness of bloom.
- (6). In constancy of bloom.
- (7). In propagating quality.
- (8). In a wonderful ability to retain its brilliancy of color in the hottest of weather.

We have observed this Geranium and present the above claims as based upon personal experience.

"HELEN MICHELL" IS SEMI-DOUBLE, OF THE CLEAREST POSSIBLE SHADE OF SCARLET, IS EARLY IN BLOOM, AND FLOWERS VERY FREELY DURING THE ENTIRE SEASON

It grows compact medium dwarf, with lustrous green foliage and throws up gigantic flower-heads very freely. We claim it to have the largest flower-heads of any of the Bedding Geraniums. The individual blooms measure 2½-inches across. It is a common occurrence that a single 4-inch pot plant shows four fully open gigantic flower-spikes, several half open and more in bud.

At the time of writing this circular (August) our trial bed of these is the most perfect sight one could wish for.

Its propagating quality is the best ever. More cuttings can be made from this variety than any other in existence.

To compare it with some of the best known commercial scarlet varieties will simply state that it puts the present standard bearer, "Alphonse Ricard," entirely in the background and soon will supplant it altogether.

There are more Scarlet Geraniums grown than any other color, so be in line and grow the best, AND THE BEST TO-DAY AND FOR SOME-TIME TO COME, is

Philadelphia, June 15, 1912.

Gentlemen:

Relative to the new Geranium, "Helen Michell," which was shown to us a few days ago, would say that we consider this variety a GREAT IMPROVEMENT over Alphonse Ricard. The flower is borne on a long, stiff stem, is MUCH LARGER than the Ricard variety, and the color is superb. It appeared to us to be a very VIGOROUS GROWER and UNUSUALLY FREE. We have known of this variety for the past two years and think it will be one of the grandest bedders in commerce.

Yours truly,

ROBERT CRAIG CO.

White Marsh, Md., June 10, 1912.

Gentlemen:

We take pleasure in assuring you that we were very favorably impressed with the new GERANIUM, "HELEN MICHELL." It certainly possesses merits of exceptional value to the grower, and we are confident it will immediately find its place among the leading class of Geraniums.

Respectfully yours,

SHEEP MANURE

WIZARD Brand Pulverized Sheep Manure is not only good for the lawn.

It is equally valuable in the greenhouse garden for flowers, fruits or vegetables. In landscape work, for trees, shrubs and vines.

In commercial soil cultivation, orchards, vineyards, meadow and hay lands, and for drilling in with grain.

The continued use of commercial fertilizers, chemical plant food, etc., stimulates and forces plant growth but leaves the soil in no better condition after the crop is removed than before application. In fact, their continued use gradually wears out the natural productiveness of the soil and eventually makes it almost impossible to mature any kind of crop without their assistance.

Pure manure builds up soil structure. The humus and organic matter it largely supplies increases the water holding capacity of the soil, materially improves its mechanical condition and restores to active use dormant fertility of great value.

Whatever your use for fertilizer may be, you can profitably and economically use Wizard Brand Pulverized Sheep Manure.

The AUTO-SPRAY
 No. 1 is the *standard of all compressed air sprayers*. It consists of a reservoir of about 4 gallons capacity made of heavy material, either of brass or galvanized steel as ordered. In this tank is inserted and locked our brass air pump which may be attached or detached by the simple shift of the cam. To this reservoir is attached a lead of discharge hose with customer's choice of any one of the shut-off attachments shown on page 4. To the shut off is attached a nozzle, and the nozzle may also be operated in connection

Spraying Potatoes

THE AUTO-Spray No. 1 is used for spraying trees, shrubs, vines, greenhouses, poultry houses, hospitals and stables, for disinfectants for sheep and cattle dip and cattle fly oil. It may be used where any other spray pump can be used, and will handle all spray solutions, including whitewash and cold water paint.

How it Works

The AUTO-SPRAY No. 1 is operated by working an air pump by which air is compressed on top of the solution. After the pressure is generated the operator has nothing to do but direct the spray. A few strokes of the plunger will compress enough air to operate the machine several minutes, and two pumpings will discharge all of the contents.

How it is Made

The AUTO-SPRAY No. 1 is made of heavy material throughout, and the brass machine which we *strongly recommend*, is practically indestructible because it cannot be affected by the various spray solutions. The construction throughout is thoroughly mechanical and so simple that it is not liable to get out of order. There are no screw connections, the pump is locked to the tank by a cam. Air tight and convenient. The pump is seamless brass, of extra large diameter, thus ensuring high pressure.

EXTRA EQUIPMENT is illustrated and priced on page 4.

A SPECIAL TUB FOR THE FLORIST

MICHELL'S KEYSTONE PLANT TUB

THE MOST ECONOMICAL FLORIST TUB

PLANTS, large or small, appear always to better advantage when planted in tubs instead of pots. They are easier handled because they are much lighter in weight; they are more attractive, and bring a higher price. Tubs have welded hoops (and neat handles, when desired at extra prices as mentioned below.) Unlike pots they do not break, nor do they require special packing when used in shipping. Made of white cedar, they are by far the *cheapest, neatest, lightest, and best* florist tub put on the market.

Please note the full assortment of sizes, all of them being painted inside and out and their tops finished round bevel.
